Quick Action by Firefighters Limits Damage to Tualatin Storage Facility

Firefighters from Tualatin Valley Fire & Rescue were dispatched shortly before 1:00pm to a report of a commercial fire at 6725 SW Bradbury Ct. in Tualatin. Multiple callers to the Washington County 911 center indicated heavy smoke in the area of the Golden Key Mini Storage. First-arriving firefighters reported heavy smoke coming from the center of the storage facility. Once inside the facility, firefighters reported smoke and flames from at least one unit, with several surrounding units threatened by fire. Difficult access to the complex forced firefighters to stretch several hose lines by hand into the complex. Firefighters also had to remove the contents from several units. TVF&R firefighters were assisted on scene by firefighters from the Lake Oswego fire department.

It took approximately 20 minutes for the 25 firefighters on scene to bring the fire under control, and fire damage was limited to four units in the complex. There were several surrounding units that sustained heat and smoke damage. There were no injuries, and TVF&R fire investigators are currently working to determine a cause of the fire. The owners of the storage facility will be working to contact individuals whose units were affected.

No damage estimate is available at this time. It was reported that the building was insured.
