1. Names and address of the owners of the tent, canopy or air-supported structure.

2. Date the fabric was last treated with flame-resistant solution.

3. Trade name or kind of chemical used in treatment.

4. Name of person or firm testing the material.

5. Name of testing agency and test standard by which the fabric was tested.

**Heating and Cooking Equipment**

- Cooking and heating equipment shall not be located within 10 feet of exits or combustible material. (OFC 3104.15.4)

- Outdoor cooking that produces sparks or grease laden vapors shall not be performed within 20 feet from a tent, canopy or membrane structure. (OFC 3104.15.6)

**LP Gas**

- Portable LP-gas containers with a capacity of 500 gallons or less shall have a minimum separation between the container and structure not less than 10 feet. (OFC 3104.16.2.1)

- Portable LP-gas containers with a capacity of more than 500 gallons shall have a minimum separation between the container and structures not less than 25 feet. (OFC 3104.16.2.2)
2.2 The aggregate floor area of the building and membrane structure, tent or canopy shall not exceed the allowable floor area including increases as indicated in the International Building Code.

2.3 Required mean of egress provisions are provided for both the building and the membrane structure, tent or canopy, including travel distances.

2.4 Fire apparatus access roads are provided.

Fire Breaks

An unobstructed fire break passageway or fire road not less than 12 feet wide and free from guy ropes or other obstructions shall be maintained on all sides of all tents and membrane structures unless otherwise approved by the fire code official. (OFC 3103.8.6)

Anchorage Requirements

Tents, canopies or membrane structures and their appurtenances shall be adequately roped, braced and anchored to withstand the elements of weather and prevent against collapsing. Documentation of structural stability shall be furnished to the fire code official on request. (OFC 3103.8.2)

Separation of Generators

Generators and other internal combustion power sources shall be separated from tents or membrane structures by a minimum of 20 feet and shall be placed on an approved surface. Such equipment shall be isolated from contact with the public by fencing, enclosure or other approved means. (OFC 3104.19)
Means of Egress Illumination
- Means of egress shall be illuminated with light having an intensity of not less than 1 foot-candle at floor level while the structure is occupied. Fixtures required for means of egress illumination shall be supplied from a separate circuit or source of power. (OFC 3103.12.7)

Flame-Resistant Treatment
- Before a permit is granted, the owner or agent shall file with the fire code official a certificate executed by an approved testing laboratory, certifying that the tents, canopies and membrane structures and their appurtenances, sidewalls, drops and tarpaulins, floor coverings, bunting, combustible decorative materials and effects, including sawdust when used on floors or passageways, shall be composed of flame-resistant material or shall be treated with a flame retardant in an approved manner and that such flame resistance is effective for the period specified by the permit. (OFC 3104.2)

Membrane structures, tents or canopies shall have a permanently affixed label bearing the identification of size and fabric or material type. (OFC 3104.3)

An affidavit or affirmation shall be submitted to the fire code official and a copy retained on the premises on which the tent or air-supported structure is located. The affidavit shall attest to the following information relative to the flame resistance of the fabric: (OFC 3104.4)
