

# Controlled Field Burn/Firefighter Training

September 24-25, 2013 10:00 - 6:00 pm

The burn area designated above is located just south of the Clean Water Services Durham Treatment Facility in Tigard. This 25-acre property along the Tualatin River was once home to the John Thomas Dairy and consists of riparian forest, oak woodland, and wet prairie. Clean Water Services has removed invasive species and planted over 30,000 trees and shrubs at this location since 2007.
